

INTRODUCTION

The abstracts* below were presented during the Brazilian Scientific Moment at the XVI World Gymnaestrada.

As many Gymnastics for All (GfA) groups are from universities in Brazil, our participation in the XVI World Gymnaestrada has optimal value because it is linked with discussions and presentations lead by our researchers.

The Brazilian GfA Committee organized and conducted a round-table meeting on Sunday, July 7th, from 11:30 to 12:30 at the Trade Exhibition Centre in Dornbirn, Austria.

The event had the support of the International Gymnastics Federation (FIG) and the Local Organizing Committee (LOC - Dornbirn).
